TIME TO BUILD

Under 15 min

A 3-step quickstart guide · 2026 edition

Bring anime magic to **the browser.**

Hand signs trigger effects. Effects pull users in. Users come back for more.

The Naruto Hand Signs AR Template is one of Greta's most loved interactive starters. It uses your camera to detect classic anime hand signs and triggers visual effects in real time, directly in the browser, with nothing to install.

This short guide walks you through three things: grabbing the template, customizing it inside Greta, and publishing it on the Marketplace where other creators (and fans) can discover and remix your work.

Whether you want to build a fan project, a portfolio piece, or a fully monetized interactive experience, this is the fastest way in.

II

You don't need to know how AR works. You just need an idea, a template, and the imagination to remix it into something only you would make.

Three steps. One AR website.

Follow these in order. By the end, you'll have a live, shareable AR experience under your name.

1

STEP ONE

Grab the template

Open the free Naruto Hand Signs AR Template in the Greta Marketplace. It loads directly in your browser, with no downloads or setup. Start experimenting with the interactive AR effects right away to see what's possible.

→ Open Template

app.greta.sh/marketplace?template=tm-61176abe-33a5-425b-88a6-4fa3d0e37c57

2

STEP TWO

Create with Greta

Open the template in Greta and make it yours. Tweak the visuals, swap in your own assets, change the triggers, add your content, write a story around it, all with no code. Greta handles the build, you handle the creativity.

→ Start Building

app.greta.sh

3

STEP THREE

Publish & earn

Showcase your remix on the Greta Marketplace. Reach a wider audience of creators and fans, and start earning from your interactive websites. The more polished and personal your version, the further it travels.

→ Learn the Marketplace

app.greta.sh/learninghub/greta-marketplace

Ready to build something unforgettable?

The template is free. The tools are open. Your only job is to
make something that didn't exist this morning.
